

Order Management Policy

Purpose: Defines controls for creating, reviewing, modifying, and completing customer orders.

Order Accuracy

Customer, product, quantity, pricing, and requested delivery information should be validated before order processing.

Order Changes

Material changes to quantity, price, customer, or delivery requirements should be reviewed before execution.

Cancellation

Order cancellation should be documented and handled according to the applicable business process.

Data Integrity

Order records should remain consistent with the underlying customer and product master data.

Exception Handling

Orders with missing or conflicting information should be routed for business review rather than processed automatically.
