

Procurement Process

Purpose: Defines the standard procurement lifecycle for acquiring products or services.

1. Requirement

A business requirement is identified with the required product, quantity, timing, and business justification.

2. Supplier Identification

Potential suppliers are identified and evaluated using available supplier information.

3. Purchase Request

The purchase request is submitted with the required details and supporting justification.

4. Approval

The request is reviewed according to the applicable approval thresholds and organizational rules.

5. Purchase Order

After approval, the purchasing process can proceed to purchase-order creation.

6. Receipt and Invoice

Received goods or services and supplier invoices are processed according to the organization's controls.
