

Sales Process

Purpose: Defines the standard enterprise sales process from customer inquiry through order completion.

1. Customer Inquiry

Sales teams capture customer requirements, requested products, quantities, delivery expectations, and relevant customer information.

2. Customer Validation

Before processing an order, customer information should be validated against the available customer master data.

3. Order Creation

A sales order records the customer, order date, requested items, quantities, prices, and applicable delivery information.

4. Order Review

Orders should be reviewed for completeness, product availability, pricing, and delivery requirements.

5. Fulfillment

After approval and availability checks, the order proceeds through fulfillment and delivery activities.

6. Order Completion

The order is considered complete after the required fulfillment and business confirmation steps are completed.
