

Supplier Management Policy

Purpose: Defines basic controls for supplier onboarding, information management, and supplier performance review.

Supplier Onboarding

Supplier information should be validated before the supplier is used for business purchasing.

Supplier Master Data

Supplier contact, location, and other relevant master data should be maintained accurately.

Product Association

Products supplied by a supplier should be traceable through the relevant procurement records.

Performance Review

Supplier performance should be reviewed using appropriate business measures such as delivery reliability and quality.

Risk and Exceptions

Supplier issues that create material business risk should be escalated for appropriate review.
